Developer

Offer

Specialist service provider for mobile ultra high-pressure water jet and water cutting technology

Use our technology to speed up sewer refurbishment measures and save time and money. We support you with this by using our Drain-Jet Robotics® system, a proprietary development of Mauerspecht. This innovation combines the high-pressure water jets with adapted sewer robotics technology.

The use of Drain-Jet Robotics® provides the opportunity to optimise sewer refurbishment in terms of time and economically.

Find out about our diverse product range relating to ultra high-pressure water jets and water-jet cutting - We will be pleased to consult with you personally.
